The article further reports that S-ATA II Phase 1 will improve management of the storage system including fan control, hard-drive status indicators, backplane temperature
15 control, and new equipment insertion indicators; and will include support for SES, SAF-TE storage management that is not present in Parallel-ATA. Additionally, the article discloses that S-ATA II Phase 2 will include a port supporting the taking-over thereof by two active hosts without requiring
20 system shutdown.

 According to the requirement set forth in 37 CFR §1.98, a copy of the cited Chinese reference and its English language abstract is included to fulfill the concise
25 explanation requirement.
